

# Transfiguration 'Temper' prices reduced

*Transfiguration cartridges are masters of natural musicality. The yokeless ring-magnet generator construction places the moving coil at the focal point of the magnetic flux field leading to a new level of focus and natural resolution due to the reduction of phase errors generated by the magnet-with-pole-pieces construction of other cartridges.*

To make way for the new flagship Transfiguration Orpheus cartridge, the 'Temper V' and 'Temper W' models have been reduced in price to £1,995.00.

## Design Concept

Utilising a ring magnet for a moving coil cartridge has enabled five unique design improvements:

- Coils inside the magnet
- No yokes
- No magnetic irregularities
- Coils at the crux of the magnetic focus
- Intimate coil/magnet coupling
